Roadmap

Introduction

Project Overview

Gold Invest NFT (GIN) is a next-generation blockchain project integrating the intrinsic stability of gold with the scalability of NFTs. By linking each NFT's profitability to the international price of gold, our project introduces a transparent, decentralized, and innovative method of investing in digital assets.

The Problem

Traditional gold investment lacks accessibility and digital liquidity. Meme coins lack sustainability. NFT projects lack intrinsic value.

Proposed Solution

Gold Invest NFT integrates real-world value with blockchain-native mechanisms: NFTs backed by gold pricing, plus a future meme coin for community fun.

Fees & Rewards

Action	Condition	Fee
Buy	Any NFT	0%
Sell	Hold for < 6 months	24%
Sell	Hold for \geq 6 months	0%

Profit Tracking and Withdrawal Schedule

Profit Visibility: All accumulated profits will be visible and updated daily on your personal site dashboard.

Withdrawal Schedule:

Users (Levels 1 & 2): Once per month.

Users (Levels 3 & 4): Twice per month (Bi-weekly).

Users (Level 5): Once per week.

Withdrawal Fee: Profit withdrawals are completely free of charge (0% fee).

Our Three Pillars

Gold as the Base Layer

An enduring and timeless store of value, universally recognized and accepted across the entire globe, transcending all borders and cultures.

NFT Scalability

Globally verifiable digital uniqueness, indisputable and sovereign ownership, and seamless, instant transferability across any platform.

Community Empowerment

A dynamically growing and evolving ecosystem, fundamentally powered by a core commitment to radical transparency and mutually beneficial, shared growth for all its participants.

Core Features

Decentralized & Transparent

Fully decentralized, no KYC. Transparent gold-pegged NFT model.

Solana-Based NFTs

Fast, cheap, and scalable transactions on the Solana blockchain.

Ecosystem Expansion

Roadmap-driven development with gradual ecosystem expansion.

Meme Coin (GIN)

Gin

Community Reward

Crafted and conceived exclusively as an engaging, lighthearted, and purely recreational incentive system designed solely for the enjoyment and rewarding of our dedicated community members, this initiative possesses no inherent functional purpose, practical application, or direct utility within the broader NFT-gold ecosystem or its core operational framework.

Future Ecosystem

- NFT Marketplace
- NFT Lending system
- Partnerships with global projects
- Advanced yield mechanics (APY up to 72%)
- International collaborations for brand expansion

Brand Identity

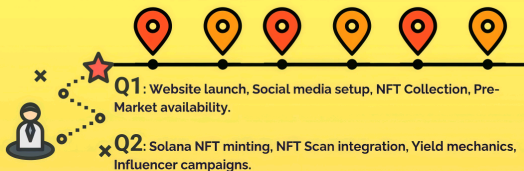

A definitive and iconic symbol of our unique brand identity, our visionary ethos, and our powerful, enduring presence within the dynamic and ever-evolving cryptocurrency world.

Tokenomics & Distribution

The comprehensive tokenomics model, including the detailed allocation, vesting schedules, and distribution mechanisms, will be fully transparent and disclosed to the public at the time of our official token launch. Our primary focus for exchange listings will be on decentralized exchanges (DEXs) to ensure broad and permissionless access, with strategic plans to explore and establish potential centralized exchange (CEX) partnerships in subsequent phases of our development roadmap.

GIN
GOLD INVEST NFT

Q3: Meme coin launch, Community campaigns, NFT airdrops, Educational content.

Q4: NFT Marketplace, NFT Lending, Strategic partnerships, CEX listings.

Beyond: Expansion into new NFT products, cross-chain integrations, global partnerships, innovative revenue models.

Our Team

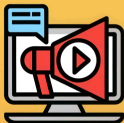

Adrian Russell - CEO

Luca Miller - CTO

Lea Cameron - COO
